

ERIK HEGRE

OFFICE DIRECTOR, BEHNISCH ARCHITEKTEN BOSTON

Erik Hegre, born in 1980, received his Master of Architecture degree from the University of Oregon and a Bachelor of Science in Architecture degree from the University of Wisconsin, Milwaukee. Working in a variety of offices prior to joining Behnisch Architekten, Erik developed an early and deep commitment toward sustainable design, building science, meticulous detailing and material selection. This early experience as designer and builder, included carpentry, welding, machining and CNC fabrication, as well as working side by side with the building trades in the field. Erik also has been publicized for his research exploring how technology, software and digital workflows can enhance the design and coordination process for projects and clients. Joining Behnisch Architekten in 2012, Erik has utilized these experiences to lead the office's digital design, fabrication, and building information modeling (BIM) efforts. He has been integral in the design and execution of numerous projects in the Boston office, monitoring and coordinating complex building systems within the overall design concept.
