

FLORIAN WALLER

PARTNER, BEHNISCH ARCHITEKTEN, STUTTGART

Florian Waller, born in 1988 in Ulm, Germany, studied architecture at the Technische Universität Darmstadt, the University of British Columbia in Vancouver and the Technische Universität München, where he received his Master of Arts degree. He gained valuable experience in the film industry for two years before devoting himself to architecture. During his studies, he developed a great affinity for timber construction, deepening his knowledge of the subject through his master thesis. This knowledge and expertise have subsequently carried over into his professional work. He first joined Behnisch Architekten in 2012 and again as architect and project manager in 2017. Working successfully on competitions as well as all phases of project work has helped him to develop broad expertise managing multidisciplinary teams and optimizing the interface between design and realization. Florian joined the partnership in the Stuttgart office in 2024.
