Kolbermoor, DE

2010–2012

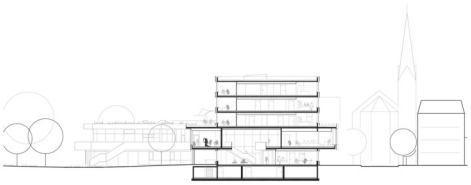

Located in close proximity to the historical city center of Kolbermoor town and directly adjacent to the park, a new town hall has been set in the urban hub of this small Bavarian town. It has been incorporated into this environment both in terms of its appearance and its offerings. It is a lively building, whose two-storey, undulating building structure and public spaces create a transition to the park, which has also been redesigned. The five-storey administrative structure forms a striking closure to the area in the east of the city and is a suitable counterpart to the parish church in the west of the centre.
