

- GOTTHARD-MÜLLER-SCHOOL BERNHAUSEN
Filderstadt, DE

2006–2020

In Filderstadt, south of Stuttgart, we created a new school campus by carefully integrating a new building into the existing context of two schools and a sports hall, supporting a contemporary pedagogical concept centered around all-day learning and care. This addition accommodates the Gotthard-Müller elementary and community school within an organic design, the staggered floors and terraces of which emphasize a strong horizontal expression.
