

• HARVARD UNIVERSITY
BIKE SHELTER
Allston, MA, US

2020

The new building for Harvard’s Science and Engineering Complex (SEC) combines a cutting-edge location for scientific research and teaching with innovative design and a sustainable building concept. As one of the first construction projects undertaken by Harvard University at its new site in Allston, it also sends a clear signal, exemplifying the vibrant development of the outdoor facilities on the campus and the integration of existing public facilities into the urban infrastructure.
