

• KITA PIONEER-KASERNE Hanau, DE

2019–2022

The day care center KITA Pioneer-Kaserne demonstrates the translation of a particular pedagogy into an unconstrained architectural form: a day care concept focused on nature and the environment requires a structure that serves as an interface between the surrounding woods and the interior spaces. Rather than a compact building, a series of nested and protruding volumes increase the building envelope, intensifying exposure to the wooded surroundings.
