

• LIVING ON THE ALTMÜHL RIVERSIDE
Eichstätt, DE

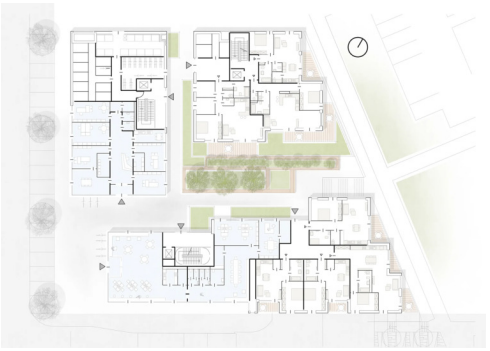

2014–2018

Located idyllically at the bank of the river Altmühl in Eichstätt, the multistory building complex with its terraced balconies sets new standards of urban building. The complex is structured in two building sections that blend in well in the scale of the “Spitalstadt” development site. Their central location close to the station, the urban building reference to the Willibaldsburg castle in the west and the panoramic views to the historic residential city as well as the monastery all contribute to the outstanding settings for superior living and working.
