

• LURUP NEIGHBORHOOD SCHOOL
Hamburg, DE

2015–2021

The design for the new Lurup district school in Hamburg is defined by lightness and openness. These spatial properties reflect and complement the school's educational concept, supporting it through a variety of learning environments designed to foster communication. By adding a community school, the project is anchored in its local context, transforming it into a neighborhood center that offers youth programs and adult education.
