

• COMPETITION - NEW EXHIBITION BUILDING “WORLD OF TEMPTATIONS” Erfurt, DE

2024

The new exhibition building *World of Temptations* is unique not only in its mission to support people in leading healthy and self-determined lives, but also as a distinctive urban building block that enhances its surroundings and integrates harmoniously into the cityscape. The building is intended to activate the public realm and invite interaction, while at the same time offering a degree of privacy for professional training, workshops, and a wide range of events. The goal is to create a building that, through its architecture, establishes a distinctive place—one that encourages appropriation and adaptation while embodying all aspects of future-oriented construction. A place that communicates and simultaneously functions as an exhibition space, workshop, research facility, and workplace.
