Gröbenzell, DE

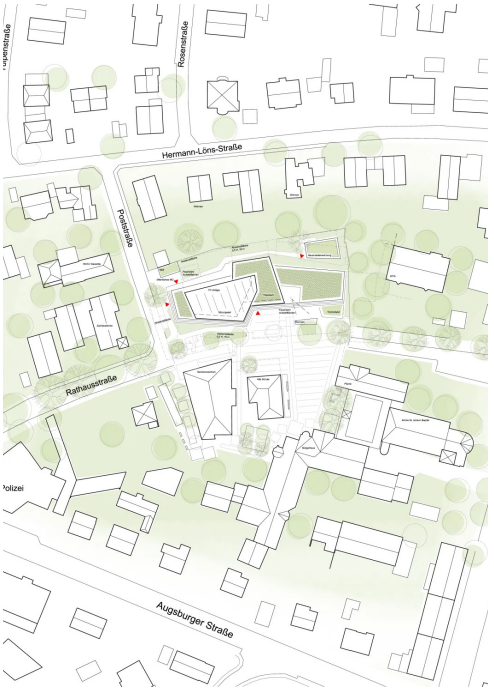

2016–2021

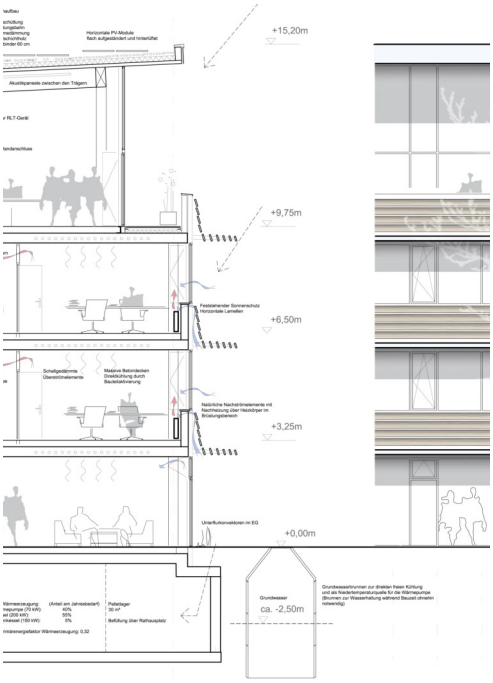

The site for the planned new town hall building is situated in the town centre of Gröbenzell, surrounded by two churches and a public square that is used for markets and events. What sets this structure apart is its ability to balance a significantly larger functional volume with the delicate, small-scale structure of the residential municipality. Set among greenery, the building preserves the unique flair of a garden city and integrates harmoniously with its immediate surroundings of single-family and terraced houses.
