

• ROBERT BOGOMOLNY LIBRARY
Baltimore, US

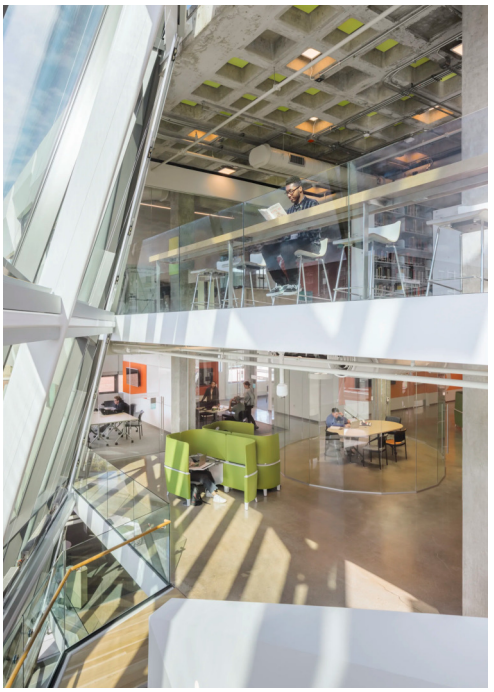

2014–2018

The transformation of the existing University of Baltimore's Robert L. Bogomolny Library respects the memory and history of the original design while also updating it to contemporary standards for research and environmental demands—it is now an important meeting point on campus. While we maintained the structure's original massing, we also added a glass hall commanding a significant presence on the west facade.
