

• SPORTPARK OST
Regensburg, DE

2020–2025

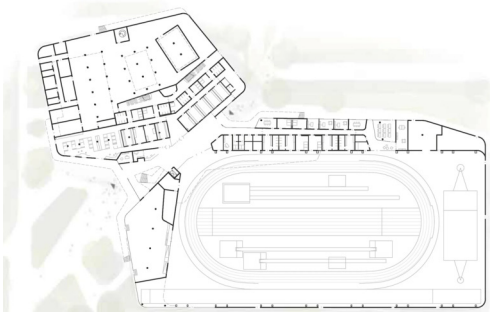

Awarded first prize in an interdisciplinary design competition, the project for the new Sportpark Ost in Regensburg unites an athletics training hall and an indoor swimming pool into a forward-looking ensemble that merges high-performance functionality with identity-shaping architecture. At the urban scale, it provides a planning impulse for transforming the former barracks district in the eastern part of Regensburg. The vision is to create a barrier-free, sustainable sports center with a reach and impact extending beyond the region.
